

PRODUCTION • TRADE • INSTALLATIONS
OF PRECONSTRUCTED SYSTEMS FOR SUN AND HAIL PROTECTION

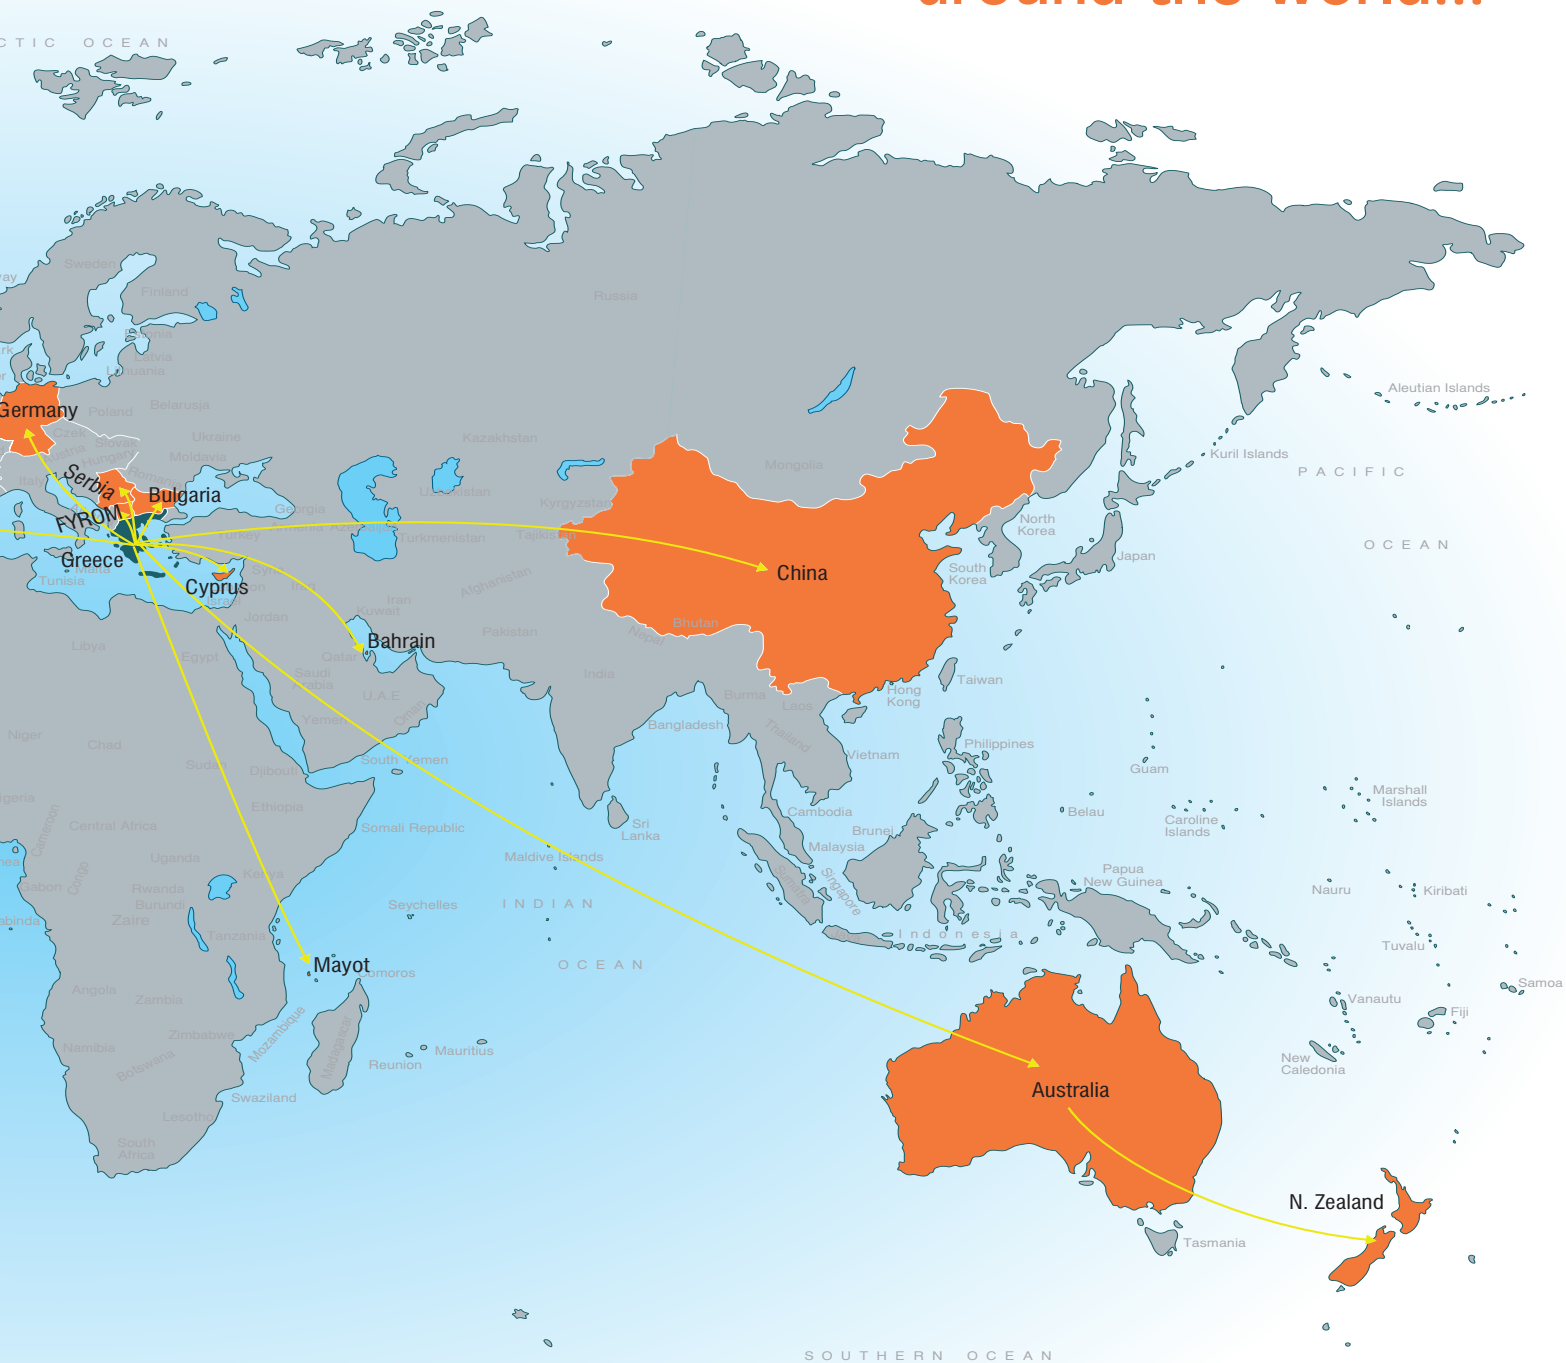

We cover your needs

around the world...

Perfect Shade S.A. is the biggest Greek company which operates in the production, trade and installation of metallic pre-constructed shade and hail protection systems of patented design.

The full name of the company is "PERFECT SHADE S.A. PRODUCTION – TRADE OF SHADING SYSTEMS" and resides in Ag. Stefanos of Attica. The company has a network of representatives and salespersons in Athens, Thessalonica and Cyprus managing a geographical coverage throughout Hellas and Cyprus. It exports in 11 countries.

Using the technical background of many years and marks a successful course though the uniqueness and high quality projects throughout Hellas. The philosophy of our company is to provide immediate solutions to our customers regarding their needs for high quality and competitive prices. In addition, we are devoted to adjust our systems in order to provide

the most effective solutions for the customer's satisfaction.

Our quality control procedures, the immediate demand correspondence, the analysis of customers' needs, our qualitative standardized systems, the size of our installation projects in Hellas and Cyprus along with our many years of experience, make Perfect Shade the unique solution for the application.

The uniqueness in design along with the high quality of the systems, distinguish Perfect Shade S.A. from the competition, being the most reliable solution for protection from sun, hail and other extreme weather conditions.

Service

Our company has developed sophisticated methods of production and alteration in order to manage the total standardization of its shade and hail protection systems. In our manufacturing facilities in Aspropirgos we use the highest grade materials, under constant technical and quality control, devoted to absolute customer satisfaction.

Application

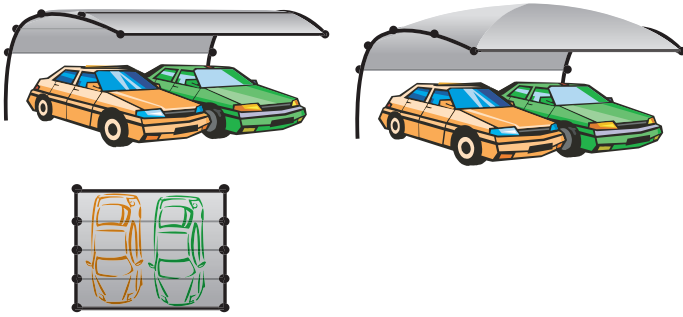

Perfect Shade systems are applicable to a wide variety of residential and commercial use: Automotive dealers, RV and carports, pool decks and patios, commercial and apartment complexes, motel and hotels, restaurants, parks and recreation facilities, boat docks, playgrounds, sports courts, schools and child care centers, shopping centers, car washes e.t.c.

Installation

The installation of our systems is immediate, thanks to our pre-engineered design and qualified installation personnel. The excellent background and skills of our associates constitute a guarantee for quality and perfect result. Our installation procedure does not interrupt the occupation of the parking lot, therefore our products are choice number one to most auto dealers and commercial plazas.

● ARC NORMAL

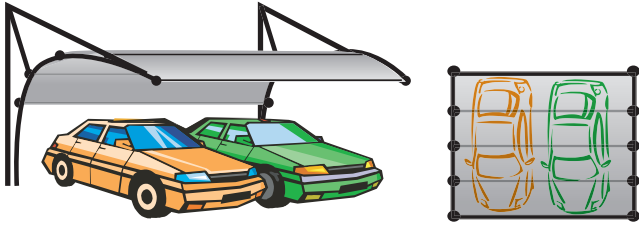

Twin – pole, one – sided arc normal construction support which expands in any desirable length.

ARMORED

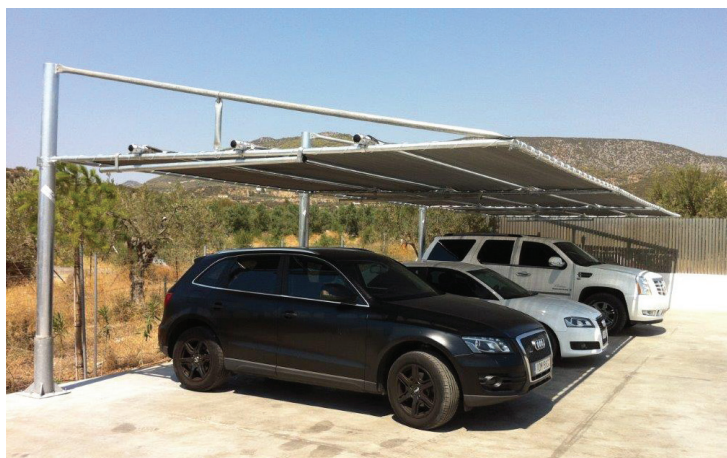

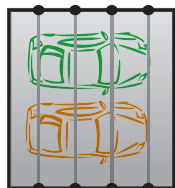

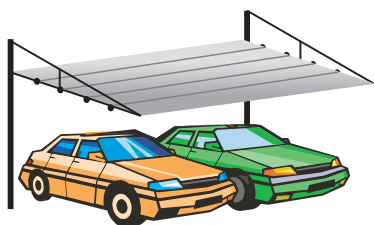

Armored twin – pole, one – sided construction which is supported by two extra poles for endurance to extreme weather conditions.

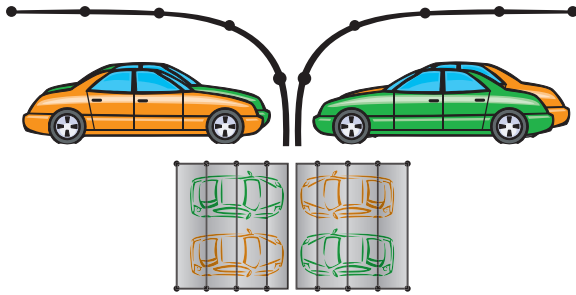

● PERGOLA

Twin – pole, one – sided construction with flat roof top expanded in any desirable length.

● BACK-TO-BACK

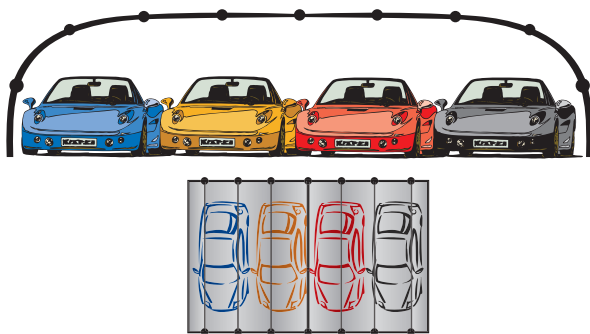

Twin – pole, one – sided construction support placed back-to-back expanded in any desirable length.

○ TUNNEL

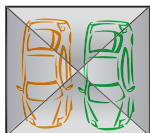

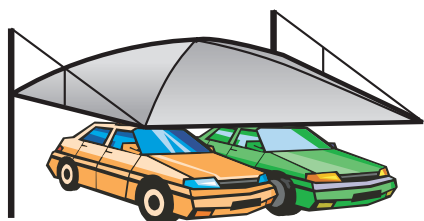

Twin – pole, one – sided construction support structures are placed opposite to one another.

● UMBRELLA

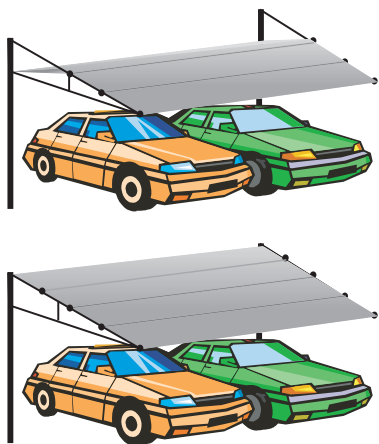

High quality constructions available in combination with all the above types of systems.

● SKEPI

Twin – pole, one – sided construction with sloping roof (ideal for warehouses).

● TENSILE STRUCTURES AND SPECIAL APPLICATIONS

Tensile structures and other special applications which are characterized by adjustability and variability depending on custom made demands.

Product Benefits
